Art Unit: 1743

1. The disclosure is objected to because of the following informalities: On page 1 of the specification after the title of the invention, the following sentence should be inserted so as to update the status of the parent application: --This application is a continuation of application serial no. 09/988,746, filed on November 20, 2001 and now US Patent no. 6,635,489 issued on October 21, 2003, which claims priority to provisional application serial no. 60/249,452, filed on November 20, 2000.--.

Appropriate correction is required.

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,635,489. This is a double patenting rejection.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Please make note of: Lee et al, Ebata et al, Adams et al, Caetano-Anolles et al, Townsend, Murphy et al, Katz et al, Witzel et al, Hayden et al and Nagamatsu et al which were cited in the parent application as disclosing compositions containing different combinations of heteroaromatic compounds, silver metal salts, reducing agents, stopper solutions, contrast enhancing agents, etc.
